### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15-19 and 51 are rejected under 35 U.S.C. 102(e) as being anticipated by Kaza (3002/0129565). Kaza shows a dental tray (paragraph 0060) for creating dental impressions. Kaza does not specify that the tray contains radiopaque material. However the claims recite that one of the tray material and the impression material has the radiopaque agent. Accordingly, in the case that the impression material has the agent, Kaza anticipates the claims because the impression material is not positively claimed, leaving the claim limited to a dental tray made of a material, the radiation source, etc. The recitation that the respective radiopacity of the impression material and the tray material approximately match each other has not been given patentable weight in the claim because the impression material is not positively claimed. The system of Kaza includes a system for creating a digital model of a patient's teeth comprising radiation source (an X-ray source) 802, a scintillator 812, a radiation detector coupled to the scintillator, a rotatable table 804 positioned between the radiation source and the scintillator, and a computer 822 coupled to the detector.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kaza (2003/0129565) in view of in view of Coscina (3,878,610). Kaza is silent as to the form of the tray. Coscina shows a dental tray 10 comprising a base 26 having a plurality of prongs, a first wall 28 extending from one side of the base, at least one tearable portion formed on one end of one prong, the detachable portion being removable to shorten the prong length (see column 7, lines 36+). It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide system of Kaza with the tray of Coscina, in order to contain the impression material and provide a tray that is adjustable.

***Allowable Subject Matter***

Claims 1-14, 21-50 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 15 and 51 have been considered but are moot in view of the new ground(s) of rejection.
